

## SPEAKER BIO

---

### **DAVE SCHROEDERS**

David received his Civil Engineering Degree from the University of Dayton in 1989. He moved to Florida where he built over 1,000 homes. Prior to switching his attention to solar, David's business revenues exceeded \$40m His company designed and built the first zero energy home in Florida that was comparable in price to inefficient code built homes. This accomplishment earned him the recognition of the Florida Solar Energy Center and the Department of Energy as a leader and innovator in the building industry. He was invited into their prestigious Building America Program. After installing his first solar array, he became fascinated with the technology. He installed a commercial system on his office and several others for businesses near him. In a very short time, he became one of the largest solar integrators in the state of Florida. David Schroeders holds a Florida General Contractors License as well as a Solar License. He has also earned certification from the North American Board of Certified Energy Practitioners or **NABCEP**.

### **BLUE SKY SOLAR GROUP**

Consulting/EPC provider for commercial solar projects.

Over the past year Blue Sky has designed and Bid over 12MW in capacity. These jobs have ranged from a 2.5MW system on the Pearl Harbor Naval Base in Hawaii to a 50kw Naval Barracks in the Florida Keys.

Blue Sky Solar's most recent accomplishment is a 2MW system in Norfolk VA. Within 8 months Blue Sky has won over \$12 million in PV contracts. With this track record, Blue Sky has the ability to procure design contracts from manufacturers and PPA financing firms.

Blue Sky was founded by David Schroeders, an engineer by education and general contractor for 25 years.

David created a organization focused on both the big picture and the small details which make Blue Sky projects especially unique and profitable.
