ABSTRACT FOR TALK AT MBAA SOUTH DISTRICT

Today's talk will be about Acid Cleaning under CO₂ and where ClO₂ fits as a terminal sanitizer. Mike will talk specifically about the advantages of acidic cleaning under CO₂ conditions. He will also discuss the different methods of ClO₂ generation and the pro's and con's of each method when used in the brewing industry.

DIVERSEY INC.

Cleaning and Sanitation Solutions for the Food and Beverage Industries.

Diversey is leading the world to a cleaner, healthier future. It is our passion and our purpose. It's the reason we deliver superior products that help our customers protect their customers and their brands. It's the inspiration for our innovations in dispensing, dosing and packaging to reduce waste and protect workers. It's what powers our partnerships with customers and industry experts to save water and energy while delivering improved cleaning results.

Our drive toward a cleaner, healthier future is deeply rooted in our heritage. We have more than 200 years of combined experience in meeting customers' needs. We've grown and evolved through the years, from our origins in the first Johnson Wax firm in Racine, Wisconsin, the original Diversey Corporation in Chicago and through all of our legacy companies.
