

How can I see clean?

ATP Monitoring System.

Ensure

Gives you a RLU number that will let you know how your cleaning is doing.

The Ensure ATP monitoring system tells you where your cleaning program is and helps you get it where you want it to be.

All Breweries can try it free for 30 days

How can I keep records of my cleaning?

Sure Trend Software

Stores your test results and helps you gather trend analysis and shows auditors you mean business when it comes to cleaning.

You can set up different locations and change users thru Sure Trend

User friendly and free to all of you today.

ONLY PC Friendly sorry, no Macs

No matter how new or how old your facility is ATP is the way to go

In need of help. You want to make sure your facilities are clean. Stop throwing barrels of beer down the drain due to uncertain cleaning practices.

Be sure, use Ensure
Email Victor@hygiena.com
for your 30 day trial

Clean thoroughly
as best you can

Swab and see how
your cleaning is doing

No need to play the blame game when cleaning goes wrong. You must be one step ahead.

a surprise visit to an unprepared craft brewery from the U.S. Food and Drug Administration can go wrong. An FDA visit can wreak havoc on the business, shutting it down or even leading to criminal prosecution if serious violations are uncovered.

Cleaning verification is important. Auditors are inside breweries now. You can contact me and I can tell you how your cleaning program is doing. I am here to help for whenever the need arises.

EnSURE™

Key Design Features:

- Protected USB connection so no moisture can get into the system.
- Removable read chamber design allows for easy cleaning.
- Large viewable screen with backlight.
- Durable case is designed for use in the harshest environment and internal solid state detector is not affected by drops or shakes.
- Sealed keypad is splash proof and can withstand the toughest of users.
- Runs on 2 x AA batteries.
- 7 button keypad is easy to navigate for any user.

He looks like
he is sure of
his cleaning!
