

# Indexes to the *Technical Quarterly* Volume 44 (2007)

—Compiled by James J. Hackbarth, The Gambrinus Company

## Author Index

- |                          |                         |                       |                          |
|--------------------------|-------------------------|-----------------------|--------------------------|
| Adebawo, O. O., 252      | Eneje, L. O., 98        | Martin, S. A., 256    | Soriano, M. A., 84       |
| Agu, R. C., 32, 98       | Fodor, P., 179          | Odibo, F. J. C., 98   | Stewart, G. G., 256, 286 |
| Arendt, E. K., 84        | Folz, R., 278           | Ogbonna, A. C., 116   | Takacs, P., 104          |
| Armstrong, K., 40        | Gamlath, J., 8          | Orzinski, M., 190     | Tenge, C., 281           |
| Awoyinka, O. A., 252     | Garbe, L. A., 190       | Pahl, R., 278         | Thomas, K., 164          |
| Bamforth, C. W., 15, 160 | Gibson, C., 164         | Palmer, G. H., 98     | Tippmann, J., 176        |
| Barnett, J. A., 264      | Hackbarth, J. J., 104   | Parker, D. K., 23     | Ugwu, A. H., 98          |
| Bendiak, D., 40          | Harmegnies, F., 121     | Patterson, R. E., 29  | Ulmer, H. M., 84         |
| Berg, K. A., 29          | Hertel, M., 176         | Riddell, P., 164      | Vandenbussche, J., 121   |
| Boee, K., 281            | Jeney-Nagymate, E., 179 | Rodríguez, M. S., 170 | Wang, T., 286            |
| Braekeleirs, R., 121     | Kelly, A., 164          | Samp, E. J., 108      | Wuertz, A., 190          |
| Broski, G. P., 93        | Klimovitz, R. J., 183   | Schehl, B. D., 84     | Yonesawa, T., 256        |
| Budde, A. D., 273        | Lázzari, M. A., 170     | Schmitt, M. R., 273   |                          |
| Cash, F. M., 93          | Lee, E. G., 286         | Schneider, J., 190    |                          |
| Chlup, P. H., 286        | López, O. V., 170       | Silberman, L., 108    |                          |
| Clark, D. T., 160        |                         | Slier, P. J., 93      |                          |
| Demers, B. M., 19        |                         | Sommer, K., 176       |                          |
| Dennisen, L., 108        |                         |                       |                          |
| Ding, L. L., 29          |                         |                       |                          |

## Subject Index

- |  |                                  |                                |
|--|----------------------------------|--------------------------------|
| Adjuncts, malt, 121                    | Closure, 190, 278                | Fine milling, 121              |
| Air-handler, 19                        | Cold water extract, 116          | Flocculation, 40               |
| Alcohol, in vitamin-enriched beer, 179 | Colloidal stability, 29          | Flow cytometer, 286            |
| Amylases,                              | Composition, 15                  | Foam stability, 164            |
| alpha, 32, 252                         | Concentrator, 19                 | Fouling, 176                   |
| beta, 252                              | Conditioner, 19                  | Fruit-juice sparklers, 183     |
| Amylolytic enzymes, 252                | Cultivar, 252                    |                                |
| ATR technology, 93                     | Dehumidification, no-frost, 19   | Germination, 116               |
| Barley, 8, 32, 84                      | Diastatic power, 98              | Germplasm, 273                 |
| balanced carbohydrate and protein      | Endosperm, 8                     | $\beta$ -Glucan, 32            |
| modification in, 273                   | Energy drinks, 183               | Glucoamylase, 108              |
| Barrier, 190, 278                      | Enzymatic action, 264            | Glycogen, 286                  |
| Beer,                                  | Enzymes, 121                     | Grains,                        |
| as bread, 15                           | Esters, 256                      | barley, 8                      |
| vitamin-enriched; 179                  | External boilers, 176            | nonbarley, 121                 |
| Biochemistry, 264                      | Extract, 32                      |                                |
| Bread, beer as, 15                     | Fatty acids, 256                 | Haze, in beer, 23, 29, 160     |
| Carbon dioxide, 93                     | Fermentation, 98, 256            | Head retention, 164            |
| Cereals, 8                             | horizontal tank outlet pipe, 281 | High alcohols, 256             |
| Chillproofing, 29                      | performance, 104                 | High-gravity wort, 286         |
| Clear malt base, 183                   |                                  | History, of beer and bread, 15 |
|  |                                  | Hot water extract, 116         |

- Internal boilers, 176  
Intracellular pH, 286  
Isohumulone, 179
- Lactic acid bacteria, *Lactobacillus*, 84
- Maize, 252  
Malt, 40, 116  
    extract, 121  
    quality, 273  
Malting, 8, 84, 98  
    barley, 170  
    loss, 84  
Mash filtration, 121  
Mashing, 98, 256  
Measurement, 160  
Microbial action, 264  
Microbiology, 264  
Microfiltration, 164  
Microporous membrane, 164  
Mid-IR, 93  
Millet, 98
- Nitrogen, 32
- OLS regression, 104  
On-line CO<sub>2</sub>, 93
- Oxygen, 104
- Perception, 160  
PET bottle, permeation, 190, 278  
Physicochemical, 170  
Plastic beer bottles, permeation, 190, 278  
Polypeptides, 23  
Potassium bromate, 84  
Premature yeast flocculation, 40  
Protein,  
    adsorption, 164  
    hydrophobic, 23  
Proteinase, 273  
Proteolysis, 98
- Quantization, starch in malting barley, 170
- Rootlet, 84
- SASPL test, 29  
Scavenger, 278  
Soluble nitrogen, 32  
Sorghum malt, 98, 116  
Special products, 183  
Specification, 160
- Starch, 170  
Starter culture, 84  
Steeliness, 32  
Steeping, 116  
Sticky yeast, 108  
Storage, 23
- Technology, 15  
Trehalose, 286
- Vicinal diketone, 179  
Vitamins, beer enrichment, 179  
Volatile organic compounds, 190
- Wort,  
    boiling, 176  
    quality, 84  
    solids, 256  
    trubid, 108
